| 1. Octabis. Hillarie. } | { 3. Crasti. Purifica. |
| 2. Quind. Hillarie. } | |

Easter Terme, beginneth the 4. of May, & endeth
the 20. of May, and hath 5. Returns.

- | | |
|--------------------|----------------------|
| 1. Quind. Pasch. } | { 4. Quinque; Pasch. |
| 2. Tres Pasch } | |

Trinity Terme beginneth the 17 of June, and endeth
the 6. of July, and hath 4 Returns.

- | | |
|-------------------|-------------------|
| 1. Crast. Trin. } | { 3. Quind. Trin. |
| 2. Octab. Trin. } | |

Michaelmas Terme begins the 10. of October, and
endeth the 28. of November, and hath 8. Returns.

- | | |
|------------------------|-----------------------|
| 1. Octabis. Michael. } | { 5. Crast. Animarum. |
| 2. Quind. Michael. } | |
| 3. Tres Michael. } | |
| 4. Menſe Michael. } | |

Note also, that the Exchequer openeth
eight dayes before any Terme begin (ex-
cept Trinity Terme) in which it openeth
but fower daies before.

A

A description of the foure Quarters of the yeare. And first of Winter.

© in *yp. m. x.*

THe Winter Quarter Astronomically for this yeare of our Lord God 1625. began the Eleventh day of December, 1624. when the Sun did enter the first minute of *Capricorne*, and shall continue vntill the Tenth day of *March* then next ensuing, for then the Sun entreth into *Aries*, making the first Equinoctium, and beginneth the Quarter called the Spring.

This Season of his nature is cold and moyst, flegmatick, good for whole & sound people, and dangerous to them that are sicke diseased. In this Quarter of the yeare the inward parts of the Body of man are very hot, and being healthfull they may receiue great plentie of food, because naturall heate is now comforted, for it is turned and gon inward,

A Prognostication.

ward, and is there increased, and maketh digestion the better.

As touching the Sickneses of this Quarter these that follow, and such other, are like to molest many, and to abound, that is to say, Rheumes, Palsies, Coughes, Strangullion, Cathars, Siaticae, paine of the joynts, sore eyes, &c.

For the judgement of the weather, you may see it in the daily disposition of each Moneth hereafter following.

Of the second Quarter of the yeare, *called the Spring.*

☉. in ♋. 8. R.

THe Spring time (being the second part of the yeare Astronomicall) taketh his beginning the tenth day of March, when the Sunne entreteth into the first minute of *Aries*, the Equinoctiall poynt, making the dayes & nights of one equall length. This Spring Quarter continueth untill the twelfth day of *Jane* following, when the Sun enters into the signe *Cancer*.

This

Dade. 1625.

This Season of the Spring is naturally hot and moyst, Sanguine, the most temperate and healthfull time of the yeare, yet bringeth it or rather sheweth forth many sicknesles, not ingendring them by excessse, but discovering them which were inwardly bred by the distemperature of other times.

The diseases likely to molest bodies of men this Season, are Coughes, ach in the loynts, paines in the sides, tertian Agues, too h-ach, meafels, small pockes, Fevers &c.

Of the third part of the yeare called
Summer.

☉. in ♋. ♏. ♐.

Summer, accompted the third part of the yeare Afronomicall, being naturally hot and dry, and cholerick, doth begin at the endvie of the Sun into the first minute of *Cancer*, which shall be this yeare the 12 day of *June*, where he maketh the *Solstitium Estium*, and hath his greatest declination North-wards from the Equinoctiall, now is the day longest and the night shortest, and so Summer continueth vntill the 13 day of *September*.

The Sicknesles of this Season, are generally

A Pregonification.

ially hott Fevers, Tertians, continuall Agues, Vomits, and to young folkes plurifies, spitting or vomiting of blood, inflamations. &c.

Of the fourth part of the yeare, called
Autume, or Haruest.

© in 2. m. 7.

HAruest being the Fourth or last part, and Quarter of this yeare (with the Astronomers) being naturally cold and dry. Melancholick, beginneth the Thirteenth day of *September*, when the Sun forsaketh the last scruple of *Virgo*, and hasteneth into the first Minute of *Libra*, where he then maketh *Equinoctium Hyemal*; working the same effect that he did at his going into *Aries*, that is, making the day and night iust of one length, the Sunne then rising at six in the morning, and setting at six at night.

The diseases in this Quarter of the yeare most like to afflict the body, are quartine Agues, black laundies, ach in the joynts of the aged, the pyles, Goute, Sciatica, with other sicknesses very grevous. Therefore seeke counsel at the beginning for feare of late repenting

A

A briefe description how the Planets are
placed aboue the Earth in the Skie, for euery
moneth after Sunne setting, or before his rising, by
which you may perceiue how they keepe their motion
day and night all the yeare. Moreouer, the new, full,
and Quarters of the Moone; with an Astro-
nomicall iudgement of the weather
for each day of the yeare. Also
Husbandry instruction for
each moneth of
the yeare.

January.

Saurne riseth a little after Sun set. }
Iupiter is nere midheauen at Sun set. }
Mars is South-west at Sun set. }
Venus and Mercurie doth rise before Sol. }

The first and second dayes windy.

The iij. and iijj. wet.

The first Quarter on Wednesday, the v. day, at
xij. of the clock at noone.

The v. vij. and viij. frost.

The viij. and ix. windy.

The x. xi. and xij. wet.

Full

Dade. 1625.

Full Moone on Thuzday the xij. day 49. min. after
set xj. of the clock at noone.

The xij. xij. and xv. faire.

The xvi. and xvij. frost.

The xviii. xix. and xx. windy.

Last Quarter on Friday, the xxi. day 8 min. past
one of the clock after noone.

The xxi. and xxij. wet.

The xxij. xxij. and xxv. faire.

The xxvj. and xxvij. coole blasts.

New Moone on Friday, the xxvij. day, 9. min. past
vj. of the clock in the morning.

The xxviii. and xxix. frost.

xxx. xxxj. wet.

Ianuaris Instruction for Husbandry.

This Moneth set all manner of fruite Trees,
and Quicke sets, (in the new of the Moone, the
wind and weather obserued) you may set Beale,
partraps, Beanes, & Onions, if the weather prove
milde, and the Moone decreasing; &c.

February.

Saturne riseth a while after the Sun setteth

Jupiter riseth at Sun set.

Mars is past mid-heauen at Sun set.

Venus riseth before the Sun.

Mercurie riseth a while before the Sun.

The

A Prognostication.

The first, second and third frost.

First Quarter on Friday the iij. day, halfe an
hoyr after one a clock in the morning.

The iij. b. and bj. windy.

The viij. and viij. wet.

The ix. x. and xi. faire.

Full Moone on Saturday, the xij. day, 45. min.
after bj. of the clock in the morning.

The xii. xij. and xij. rare cold.

The xxv. and xxi windy.

The xviij. xvij. and xix. wet.

Last Quarter on Sunday the xx. day, 20. min. af-
ter one of the clock in the morning.

The xx. and xxi. faire

The xxij. xxij. and xxij. cold.

The xxv. #20.

New Moone on Saturday the xxvi. day at iij. of
the clock in the Evening.

The xxvi. xxvi. and xxvi. wet.
